Series
RECOM SR EC

Air handling units in heat- and sound-insulated casing.
Air flow up to **670 m³/h**.
Heat recovery efficiency up to **92 %**.

Description

The RECOM SR EC air handling units are the fully-featured ventilation units that ensure air filtration, fresh air supply and stale air extraction.

During the operation process the extract air heat is transferred to the intake air through the rotary heat exchanger.

The units are used in ventilation systems installed in various premises that require reasonable energy saving solutions and controllable ventilation systems.

EC motors reduce energy demand by 1.5-3 times and ensure high performance and low noise operation.

All models are designed for connection to ø125, 160 and 200 mm round air ducts.

Modifications

RECOM SR EC models are equipped with an electric heater.

Casing

Made of galvanized steel, internally filled with a mineral wool heat- and sound-insulating layer.

The insulation thickness is 20 mm for the RECOM 2 SR EC models and 40 mm for the RECOM 3/4 SR EC and 6 SR EC models.

Kitchen hood

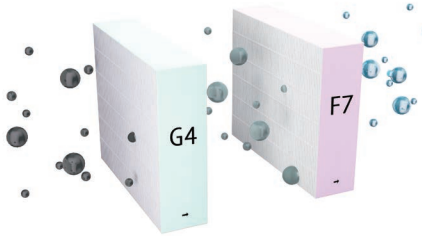
All units are equipped with a 5th spigot for connection of a kitchen hood (see the «Application options» section).

The distinctive feature of the RECOM 2 SR EC unit is the ability to connect a SR kitchen hood (available upon separate order) directly to the unit.

Filter

The two integrated G4 and F7 filters ensure sufficient intake air purification.

Extract air is cleaned by the integrated G4 filter.



Motor

The units are equipped with high-efficient EC motors with an external rotor and a centrifugal impeller.

These state-of-the-art motors offer the very best in energy efficiency today.

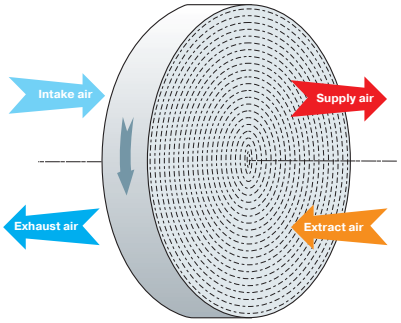
In addition to that, EC motors combine high performance and optimum control over the entire speed range. The high efficiency (up to 90 %) is a definite advantage of EC motors.

Rotary heat exchanger

The rotary heat exchanger is a short rotating cylinder filled with layers of corrugated aluminium tape packaged in a such way so as to enable free passage of the supply and extract air flows.

As the cylinder rotates the aluminium tape contained in the heat exchanger is first exposed to the supply air stream and then to the extract air stream. As a result the material undergoes repeated warming and heating cycles thereby transferring heat and humidity from the warm air stream to the cold one.

As compared to plate heat exchangers, the rotary heat exchangers are distinguished with no condensate forming, ability to maintain comfortable air humidity and extremely low freezing danger.



Rotary heat exchanger operation principle

Heater

The **RECOM SR EC** units are equipped with an electric heater. If heat recovery is not sufficient to reach the set supply air temperature, the heater is activated to warm up supply air. The heaters are equipped with protecting devices to ensure safe and reliable operation of the unit.

Automation

The **RECOM SR EC** units are equipped with an integrated control system. The controller allows integrating the unit into the Smart Home system or BMS (Building Management Systems). The remote control panel is not included in the delivery set (purchased separately). The unit is controlled using the RECOM mobile application (available soon) via Wi-Fi.

Mounting

The unit is designed for wall or floor mounting.

The access for unit and filter maintenance is available from the front panel.

The service and the back panels can be rearranged allowing connection both on the right and on the left side.

Designation key

Series	Heat exchanger type	Rated air flow [m³/h]	Mounting type	Insulation thickness	Heater type	Motor type	Control panel
RECOM SR EC	**R**: rotary	200; 280; 400; 600	Vertical	_: 40 mm **2**: 20 mm	**E**: with an electric heater	**EC**: synchronous motor with electronic control	FPFP WI-FIFPD

Control and automation

Functions	
Control via Wi-Fi using a mobile application	+
Control via a wired remote control panel	FP (option) 
Control via a wireless remote control panel	FP Wi-Fi (option) 
Control via a wired remote LCD control panel	FPD (option) 
BMS	RS-485
	WI-FI
	Ethernet
	MODBUS (RTU, TCP)
Service RECOM Server	+
Speed selection	+
Filter replacement indication	according to hour meter readings
Alarm indication	full alarm description in the mobile application
Week-scheduled operation	+
Timers	+
Boost mode	+
Fireplace mode	+
Reheater connection	integrated in E models, external reaheater cannot be connected
Cooler connection	option
Kitchen hood connection	option
Minimum supply air temperature control	+
Humidity control	option
CO_2 controller	option
VOC controller	option
Fire alarm sensor connection	option

*Option. The functionality is available when you purchase the appropriate accessory.

Technical data

		RECOM 2 SR EC		RECOM 3 SR EC	
Unit voltage [V/50 (60) Hz]		1~230			
Max. unit power without electric heater [W]		118		195	
Max. power of electric heater [W]		-	700	-	650
Max. unit power [W]		118	818	195	845
Max. unit current without electric heater [A]		1.0		1.9	
Max. unit current of electric heater [A]		-	3.0	-	2,8
Max. unit current [A]		1.0	4.0	1.9	4.7
Maximum air flow [m^3/h]		270		300	
RPM [min^{-1}]		1800		2050	
Sound pressure level at 3 m distance [dBA]		28		26	
Transported air temperature [°C]		from -25 up to +40			
Casing material		painted steel			
Insulation		20 mm mineral wool		40 mm mineral wool	
Filter	Extract	G4			
	Intake	G4, F7		F7	
Connected air duct diameter [mm]		125			
Weight [kg]		47	48	63	64
Heat recovery efficiency		from 76 up to 92		from 81 up to 90	
Heat exchanger type*		rotary			
Heat exchanger material		aluminium			
SEC class		A			

*Heat recovery efficiency is specified in compliance with EN 13141-7

Calculation of air temperature downstream of the heat exchanger:
$t = t_{outd} + k_{hr} * (t_{extr} - t_{outd})/100$,
where
t_{outd} : outdoor air temperature [°C]
t_{extr} : extract air temperature [°C]
k_{hr} : heat exchanger efficiency (according to the diagram) [%]
