

UBG

Round duct clamps with rubber gasket

Uses

- Suspension of rigid circular ducts
- Clamps UBG are especially designed for vibration attenuation

Design

The circular ducts shall be suspended by means of sendzimir zinc plated steel clamps with rubber gasket. Round duct clamps working temperature: -40°C; +120°C. They shall tolerate a maximum suspended weight of 300kg for diameters 80-400mm and 600kg for diameters 500, 630mm. The ducts from dia 80mm up to 400mm shall be suspended with 1-point suspension M8/M10 on top of the clamp or on 2 points suspension M10 (ducts dia 500,600mm) by means of threaded rods on either side of the clamp.
